The current Covid-19 pandemic has put many strains on various areas of the oil and gas business, especially when it comes to deriving commercial value from new initiatives.

During this phase of self-isolation, SOGAT 2020 can help you meet your professional and business development needs and you can benefit as we have converted the face to face aspects of conferences to VIRTUAL Online Sessions.

This way you can continue to attend interactive sessions within the virtual conference auditorium space where you can see, communicate and debate with the subject matter peers and experts and other participants. A similar format will occur in the associated exhibition where Q and A debate with exhibitors will be encouraged. Similarly within the platform’s networking center you will have the opportunity to exchange your views with fellow participants on matters within the scope of SOGAT 2020 and sour hydrocarbon management generally.

SOGAT 2020 will as ever be a virtual technical showcase of the latest developments for those operating in the sour hydrocarbon industry and will feature in the conferences and exhibition.

Sour Oil and Gas Operations - International and National developments in UAE, Oman, KSA, Kuwait, Europe, North America and South East Asia.

- SRU Design, Capacity & Operations
- Tail Gas Treatment Innovations
- Amine Treatment & Operations
- Sour Hydrocarbon HSE Management
- Sulphur Dust Control
- Sulphur R & D Usages
- Sulphur Management and Markets
- Sulphur Waste
- Sulphur Degassing Processes
- Sulphur Pit Issues
- Sulphur & H2S Measurement
- SO2 Emission Management
- Sour Water Stripping
- Debottlenecking
- Catalyst Evaluation and Improvements
- CO2 Management, Capture and Removal
- Innovations in Membranes, Molecular Sieves, Dehydration, Foaming, Chemical Cleaning etc
- Energy Efficiency within Plant Management
- Sour Hydrocarbon Materials Management
- Refractory & Reactor Furnace Material & Measurement Issues
- Contamination Management
